AI SECURITY ANALYSIS

gpt-4.1-nano - two-pass analysis

INTELLIGENCE KNOWLEDGE CHECK

TRUSTED

E-commerce platform

Recognized entity

cdkeys.com is a well-known legitimate online retailer specializing in digital game keys and software licenses. Its long domain age (over 23 years) and registration with a reputable registrar (GoDaddy) support its credibility. It is widely recognized in the gaming and digital goods market.

SCAN EVIDENCE VERDICT

90 /100

LOW RISK

The domain cdkeys.com is a well-established and reputable e-commerce platform with over 23 years of registration, verified SSL, and a trusted registrar (GoDaddy). The real-time scan evidence shows a valid SSL certificate, no known threats flagged by major blocklists, and security headers mostly in place, although missing HSTS. The redirect chain to loaded.com warrants attention, but given the domain's known reputation, this appears to be a benign redirect rather than malicious activity. Overall, the evidence confirms the domain's legitimacy, with minor technical gaps that do not elevate risk significantly.

1. Implement HSTS header to enhance security posture.
2. Monitor redirect chain to loaded.com for any future suspicious activity.
3. Ensure all security headers, including Referrer-Policy, Permissions-Policy, COOP, and COEP, are properly configured.
4. Maintain SSL certificate renewal and verify no unexpected certificate changes.
5. Continue routine threat scans to confirm ongoing safety.
