INTELLIGENCE KNOWLEDGE CHECK

UNKNOWN

Unknown — suspicious pattern

Unknown domain

Coinin.com does not correspond to any major brand, public service, or well-known infrastructure. Its registration via Alibaba Cloud and the domain age suggest it is not newly created, but there is no public reputation or association with legitimate services. The domain name itself does not match common brand patterns and lacks clear indicators of trustworthiness.

- ⚠ Domain registered via Alibaba Cloud, which is often used by hosting providers accommodating malicious infrastructure
- ⚠ No recognizable brand or service association
- ⚠ Potentially obscure or generic domain name without clear purpose

SCAN EVIDENCE VERDICT

25 /100 **MEDIUM RISK**

The domain coinin.com is unfamiliar and lacks any known reputation or association with legitimate services. Real-time scan evidence shows a valid SSL certificate but missing security headers, which is typical for low-trust or personal sites. The domain's registration via Alibaba Cloud and its age do not indicate a trusted or well-established entity. Blocklist checks are clean, but the overall profile suggests potential suspiciousness without confirmed malicious activity.

1. Monitor the domain for any future malicious activity or reputation changes.
2. Avoid engaging with or directing users to coinin.com until further verification.
3. Conduct additional analysis if the site begins to display suspicious behavior or content.
4. Consider implementing network-level filtering if the domain appears in threat feeds later.
