INTELLIGENCE KNOWLEDGE CHECK

TRUSTED   E-commerce platform   Recognized entity

Eneba.com is a well-known online marketplace specializing in digital game keys and entertainment products. It is a recognized brand with established infrastructure, registered through Amazon Registrar, and has a long domain age (~18 years), indicating legitimacy. No historical associations with malicious activity are evident from training data.

SCAN EVIDENCE VERDICT

85 /100   LOW RISK

The domain eneba.com is a well-established, trusted e-commerce platform with a long history (~18 years), registered through Amazon Registrar, and has no known malicious associations from prior intelligence. The real-time scan confirms a valid SSL certificate from a reputable issuer, and the site is served via Cloudflare with standard security headers, although some headers like HSTS are missing. Blocklist checks are clean, and the redirect chain leads back to the same domain, indicating normal behavior. Overall, the evidence aligns with prior trust in the domain, with no significant red flags detected.

1. Maintain monitoring for any future changes in security headers, especially HSTS, to enhance security posture.

2. Continue routine scans and threat intelligence checks, as current evidence indicates a safe and legitimate site.

3. Ensure SSL certificate renewal and proper configuration to sustain secure communications.

4. Verify that the missing security headers (X-Content-Type-Options, Permissions-Policy, etc.) are addressed in future updates for improved security.
