INTELLIGENCE KNOWLEDGE CHECK**UNKNOWN**

Unknown — suspicious pattern

Unknown domain

There is no prominent recognition of plinko.com as a major brand, public service, or reputable infrastructure. The domain's name resembles a generic or game-related term, which is common in various benign and malicious contexts. Without additional data, it appears to be an obscure or potentially suspicious domain with no clear association to trusted entities.

SCAN EVIDENCE VERDICT**25**

/100

MEDIUM RISK

Prior intelligence indicates plinko.com is an unfamiliar, obscure domain with no known reputation or association with trusted entities. Real-time scan evidence shows a valid SSL certificate, but missing security headers such as HSTS and X-Content-Type-Options, along with a relatively young domain age and hosting via Cloudflare. Blocklist checks are clean, but the combination of missing security best practices and the domain's unknown status suggests moderate risk. Overall, the evidence confirms a suspicious profile consistent with an unknown or potentially malicious site, warranting caution.

1. Avoid direct interaction or data submission to plinko.com until further verification.
2. Monitor network traffic for any unusual activity or redirects related to this domain.
3. Conduct additional reconnaissance, such as analyzing content or behavior if necessary, before considering any engagement.
4. Keep security controls updated and consider blocking or flagging this domain in your security infrastructure.
