**INTELLIGENCE KNOWLEDGE CHECK****TRUSTED**

Secure messaging app / Privacy technology

**Recognized entity**

signal.org is the official domain of Signal, a well-known, reputable encrypted messaging service developed by the Signal Foundation. It is widely recognized as a legitimate privacy-focused platform with no known associations with malicious activity or threat infrastructure. Its long-standing presence and established reputation support its trustworthiness.

**SCAN EVIDENCE VERDICT****85** /100 **LOW RISK**

Based on prior intelligence, signal.org is a well-established, reputable domain associated with the trusted Signal messaging platform. The real-time scan confirms the domain's legitimacy, showing valid SSL certificates issued by Google Trust Services, a long registration history, and no known threats flagged by blocklists. The absence of critical security headers like HSTS is noted but not uncommon for a trusted service. Overall, the evidence aligns with the prior trust assessment, indicating a safe and legitimate domain.

1. Maintain monitoring for any future security header improvements, such as implementing HSTS.
2. Continue regular scans to ensure no emerging threats or misconfigurations occur.
3. Verify that the SSL certificate remains valid and properly configured during routine audits.
4. No immediate action required; the domain remains trustworthy based on current evidence.
